Polar Images

A simple technique to produce an abstract polar image in Photoshop.

1. Open image in Photoshop, change the image dimensions so that the image is square.

2. Go to - filters → Distort → Polar Coordinates → click on that.

3. This will open up a box with 2 choices, select polar to rectangular (the lower one) by clicking on it.

4. Click OK.

5. Next go to → Image → Image Rotation → click 180 degrees, the image will rotate.

6. Go back to → Filter → Distort → Polar Coordinates and click on that.

7. This time select the upper selection, Rectangular to Polar

8. Click OK.

9. Now you have your finished image
